IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Application No.:) 10/797,262
Examiner:) Richard G. Hutson
Group Art Unit:) 1652
Title of Invention:) RNA-Dependent DNA Polymerase from
) *Geobacillus stearothermophilus*
Filing Date:) March 10, 2004
Attorney Docket No:) 2826067.000002

**Correction of Omission from Sequence Listing of Nucleic Acid Sequences Found in
Specification and Corresponding Sequence Identifiers in Specification**
37 CFR §1.825

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

In response to the paper mailed January 4, 2007 requiring correction of omission of sequence identifiers on page 23, lines 16, 17, and 24, Applicants are submitting an amendment to the specification. Because the sequences listed on page 23, line 16, 17, and 24 were not included in the previously-filed sequence listing, Applicants are also submitting a corrected sequence listing in both paper copy and CD-ROM (2 copies), adding the sequences found on page 23, line 16, 17, and 24 to those sequence listings.

The additional sequences listed in the sequence listing are those found on page 23, lines 16, 17, and 24 and do not constitute new matter. Also, the paper copy of the sequence listing and the 2 copies of the sequence listing prepared using PatentIn 3.3 are identical.

Please amend the above-identified application as follows:

Amendments to the specification begin on page 2 of this paper.
